AMARK has CNC lathes and machine centers to help with your medium run precision production work. With our CNC EDM, Wire EDM and CNC Machining centers we have the ability to produce complicated mold inserts for the die-cast and plastics industries and metal stamping dies.

We inspect parts throughout production, and can accommodate special inspection requests by customers. Our strict quality control procedures are carefully adhered to through marking, packing and shipping.

Centrally located in Northwest Arkansas, we have a professional staff with many years of experience in the various aspects of manufacturing precision products using the latest machining techniques available.

PRECISION MANUFACTURING SERVICES

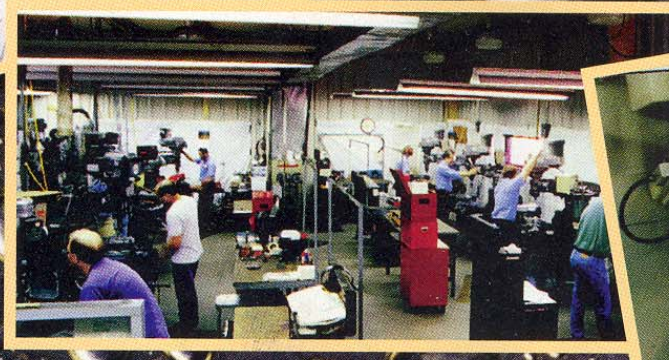

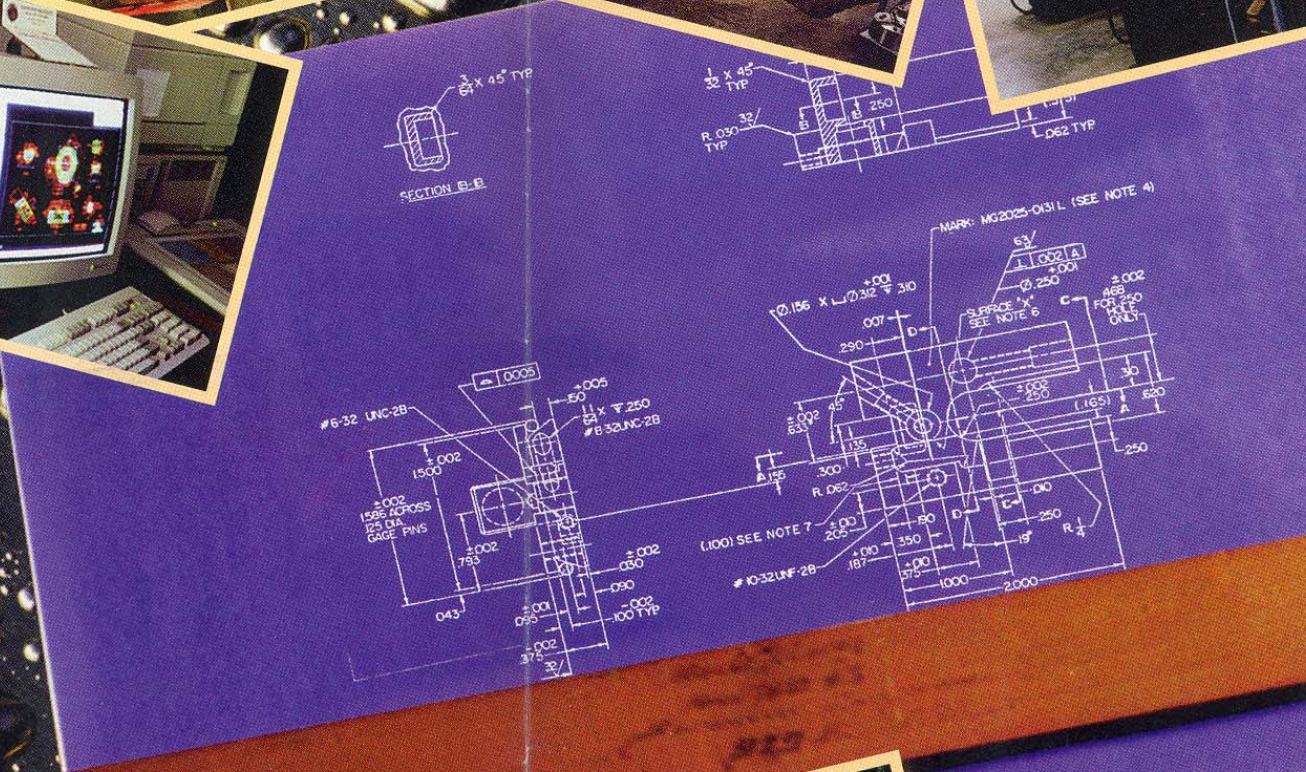

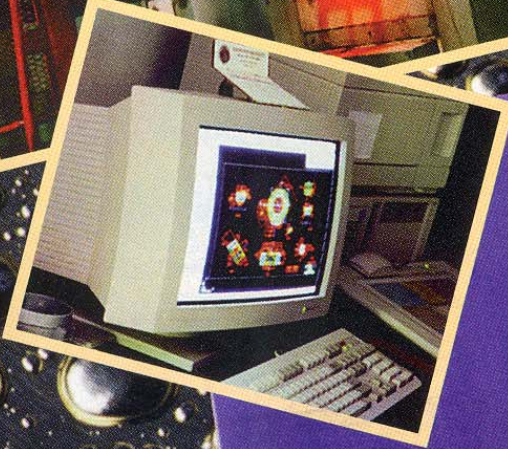

Our in-house computer system allows us to schedule production of all work and track jobs throughout our plant. This ensures accurate production completion times, and allows us to maintain permanent records of all jobs produced.

AMARK maintains a complete grinding department which includes O.D., I.D. surface grinding, honing and lapping equipment for very close tolerance and finish requirements.

We provide in-house heat treatment with a protective atmosphere furnace for precision and fast turn-around requirements. Our capabilities also include MIG, TIG and stick welding of all types of materials (aluminum, tool steels, stainless and high strength materials).

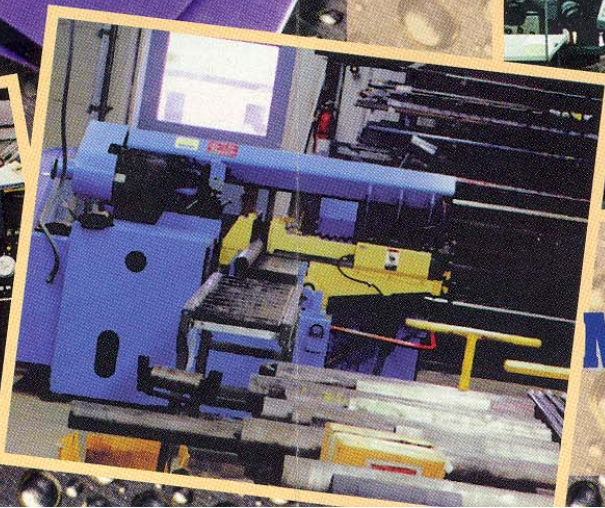

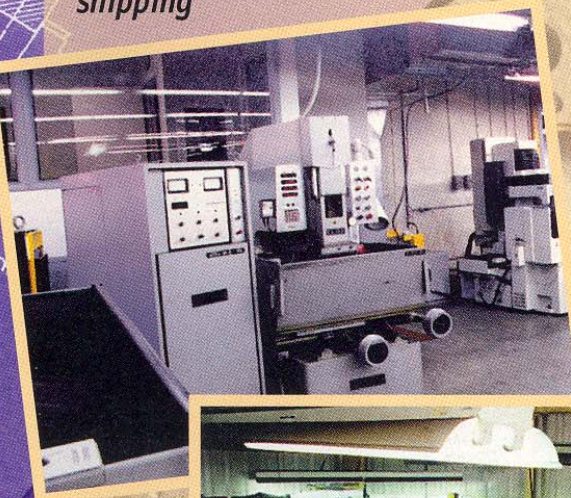

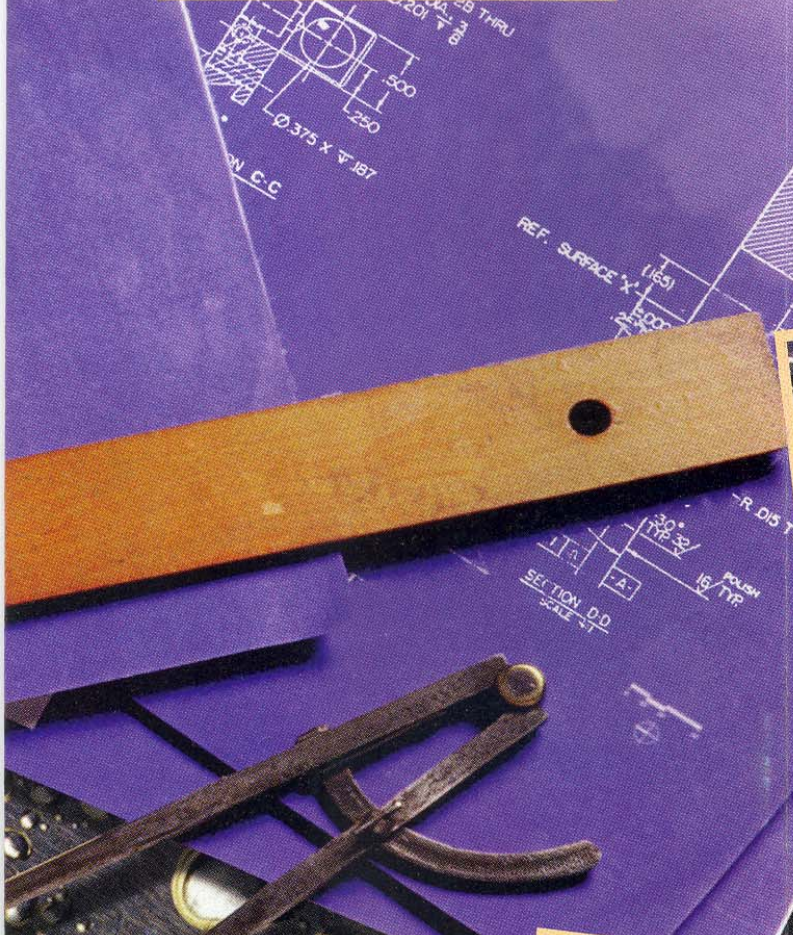

AMARK is a precision tool and die and contract machine shop where close tolerance is an every day occurrence. Since 1977, AMARK Engineering & Manufacturing has been manufacturing precision parts and assemblies to achieve exacting tolerances in a multitude of industrial and commercial applications. Some of our components have gone in the Space Shuttle...and many are shipped world-wide.

AMARK has CAD/CAM capabilities to do finished drawings to your specification, with the ability to transfer the finished drawings to our customers electronically by disk, the internet or hard copy. AMARK also keeps an extensive stock of materials on hand for new, rush and repeat production.

We manufacture parts for:

- hydraulic and optics systems
- munitions
- electric motors
- plastics industries
- poultry processing equipment
- dies
- molds
- specialized tooling
- complete assemblies including purchasing hardware, fabricating, painting, electrical, air and hydraulics, shipping

**PRECISION
MANUFACTURING
SERVICES**

Machine Capacities

Milling

Vertical 11-Bridgeports 30" x 12"

CNC Milling

Three 18" x 32" Kitamura CNC with
4th axis capabilities

CNC Turning

1³/₄" Bar 8" Dia. Swing
2" Bar, 12" Dia. Turning x 20" Long

Lathes

Three 15" Dia. with 54" between centers with trac
One 21" Dia. with 28" gap and 80" between cent
One 1" Hardinge

Saws

Automatic Cut-off Saw 12" Dia. 11" x 12" Flat
18" Band Saw

Grinding

10" x 20" Universal O.D. and I.D. Grinder
10" x 28" Universal O.D. and I.D. Grinder
14" x 30" Universal O.D. and I.D. Grinder

Honing

.060 through 6¹/₂" capacity

Heat Treat

10" x 10" x 24" protective atmosphere
8" x 10" x 10" Furnace
18" x 18" x 18" Furnace

E.D.M.

50 amp capacity Die Sinker
50 amp capacity CNC Die Sinker
Wire EDM 19" x 13" x 11"

Press

60 ton Punch Press

Miscellaneous

200 Mig
330 Heli-Arc
18" x 18" x 36" Glass Blast
75 ton Press
Final Assembly
Paint Facilities

Additional Machine Capacities

High Precision Grinding

Moore Jig Grinder 10" x 16"
grinding to .0001"

8" x 15" Surface Grinder
up to 12" x 24" Capacity

12" x 24" and 6" x 18"
Automatic Surface Grinders
